

CRUS

The region of Barolo haven't an official map of the most important areas yet, but recently the town councils have located 166 precious vineyards and now the Consorzio di Tutela have submitted the project to Ministry of Agriculture and Forestry for approval. The following plain, a research work, is the one map at our disposal. As it's for information only, it isn't a scale drawing, but it portrays the reality of the region.
